

HELLENIC AIR FORCE ACADEMY
ΣΧΟΛΗ ΙΚΑΡΩΝ

Athens, Dekeleia, 23rd of March 2020

Nomination for the Chairperson of the «Research and Development » LoD

Dear Members of the Implementation Group (IG),

according to the draft minutes and the documents of the 45th IG meeting, and regarding the new Line of Development (LoD) “Research and Development” that is to be established during the upcoming IG meeting, I would like to express my unhindered consent and support for the nomination of Associate Professor Ioannis Templalexis of the Hellenic Air Force Academy as the chairperson of the “Research and Development” LoD.

Associate Professor I. Templalexis is the Head of the Division of Thermodynamics, Propulsion and Power Systems of the Hellenic Air Force Academy. He has been an exceptional member of our Academic staff since September 2000. He has published extensively in high ranking scientific journals, he has participated in numerous international conferences, both as a presenter and as a member of the organizing committees and he retains strong research liaisons with highly reputed Academic and Research institutes. He has been attending IG meetings for over a year being actively involved in several initiatives like the international seminars.

In brief, I am truly convinced that Dr. Templalexis’ dedication and scientific profile fulfills all the requirements to chair effectively the new “Research and Development” LoD he conceived, and I have no doubt in giving Associate Professor Ioannis Templalexis, my highest and most supportive recommendation for his nomination

Yours sincerely

Major General Georgios Bompolis

Commandant of the Hellenic Air Force Academy
