ABSTRACT

This article presents a conceptual analysis of the main terms used in the analysis of the gender perspective. Given the various approaches to the gender perspective, a clarification of the meanings of the terms is needed, especially since they have lately been defined in terms of military acceptance as well. This content is part of the Military Gender Studies (MGS) Project, whose aim is to develop a model of gender perspective in the military, which will be taught in the European Military Institutions through an Army Handbook.
