

Proposal: “Research” LoD,

Ioannis Templalexis
Associate Professor, Division Head

Hellenic Air Force Academy
Department of Aeronautical Sciences
Division of Thermodynamics, Propulsion and Power Systems

Motive

Reinforce, systematize and promote the research pillar of training and education provided by ESDC.

Aim

The research LoD aims to cover research activities related, but not limited, to simple research projects during studies, undergraduate and postgraduate theses, etc. In particular it aims bringing closer all stakeholders and establish a group dedicated in research promotion.

Goals

1. Launch common research projects to be executed by two cadets and co-supervised by members of staff.
2. Introduce a scientific journal (for instance Journal of Military Applications).
3. Organize conferences to present research work.
4. Establish broader research collaborations involving cadets, officers, members of academic staff, private companies etc.

Kick off & 1st Goal (common student research projects)

1. Present the Research LoD proposal in front of the IG group.
2. Grand permission to establish the LoD.
3. Invite participants.
4. Register the status of each academic institute regarding research.
5. Define specific thematic areas.
6. Create a pool of research projects per thematic area.
7. Create a pool of supervisors per thematic area.
8. Launch common projects.

2nd Goal (Scientific Journal)

1. Decide upon the Journal contents.
2. Establish the editorial team and review process.
3. Launch the call for papers.
4. Compile volumes and obtain publication identifiers.

3rd Goal (Organize a Conference)

1. Establish the academic board.
2. Set the scientific committees and review process.
3. Launch the call for papers.
4. Realize the 1st conference.

Thank you!
