

“Research & Development”

LoD – 14

Current Status – Way Forward

Ioannis Templalexis
LoD 14 Chairperson

Hellenic Air Force Academy
Department of Aeronautical Sciences
Division of Thermodynamics, Propulsion and Power Systems

Current Status:

- Start collecting info through the dedicated documents.
- Many questions regarding Common Thesis approach.
- Poor participation during the 1st meeting

Way Forward:

- Get the documents populated enough.
- Discuss potential restrictions in running parallel thesis projects
- Agree on a timeline

General Remarks

LoD 14 Scope: Boost common research activities, just like common lecturing activities are successfully been merging through common academic semesters.

Documents already circulated aim to have:

- i) a first register of our academic status and
- ii) a starting point to form research nuclei around common thesis projects.

It is important to join this afternoon's meeting and decide all together how to move forward in bringing our research activities side by side and establish thus a second major route of European academies merging and collaboration.
