DIGICODE questionnaire is to come

In the following weeks in frame of the DIGICODE project we are going to distribute the questionnaire related to digital education skills and „feelings” of teachers and students. Results of the research will serve the project completion and will also be further shared in order to improve future digital competences.

Thank you in advance for dedication
of 10 minuts of your precious time
for filling in the questionnaire and
thereby support of the project goals.
