

“Research & Development”

LoD – 14

12th Meeting 23.5.23

Participants: 6 (Canada, Greece, Poland, Romania)

Topics Discussed:

- LoD 14 – Way Forward

Current Situation

An audience not primarily interested in research and certainly not joining this group with relevant ambitions.

Meeting 4 times a year turns out to be way too frequent for this LoD indented purposes.

However

There are great opportunities in mobilizing cadets and staff for research purposes

What have we done so far

Introduced the joint/parallel theses under any collaboration format. (even greater funding opportunities through virtual mobility)

Organize advertisement of conferences and in house journals within our community.

Establish a network of Research PoCs to circulate efficiently research related information.

One central question to be answered

Does the ESDC engages in some way with research? If yes how the research related information and issues are handled.

Way forward

Hold an extended LoD 14 meeting during the IG once a year, which:

- It will be decided and prepared at least 6 months ahead.
- It will run through both LoD allocated time slots.
- It will be advertised accordingly in order to attract key research players (industry, research PoCs, research networks representatives etc)
- It will be organized in sequential sub sessions (projects running, industry panel, etc).

Tasks

- Update the list of research PoC.
- Ask from each institution to provide a link regarding placements under research projects (list of theses, PoC, placements on running projects, etc)
- Request, collect and advertise an one page report regarding the outputs of placements, existing or upcoming.
- Announce a meeting between research representatives, beginning of next year.
