Date of the event (from-to)	11APR25-12APR25
Name(s) of the author(s)	Tomás Santos; Hugo Ferreira
Authors' institution	Academia Militar
Authors' country	Portugal

The objective of this module was to participate in the Students International Conference, which allowed us to deliver a presentation on the use of drones in modern warfare and also share experiences with fellow cadets from other countries.

Accommodation and meals were provided at the facilities of the Academia Tehnică Militară Ferdinand I, which offered excellent comfort and organization, positively contributing to the experience. The rooms were clean and in perfect condition.

These days allowed us to develop intercultural communication skills. The exchange of experiences between cadets from various nationalities was extremely enriching, fostering a better understanding of the military realities in other countries. The excellent organization of the event and the warm reception by the hosts from the Academy were also noteworthy.
