

Guardia di Finanza Academy

New Line of Development “*Law Enforcement Education*”

Law Enforcement Education

- **What? A new LoD dedicate to law enforcement Institutions with a military status of the EU**
- **Why? Many reasons behind it – Increase EMILYO network and exchange opportunities for cadets' education**

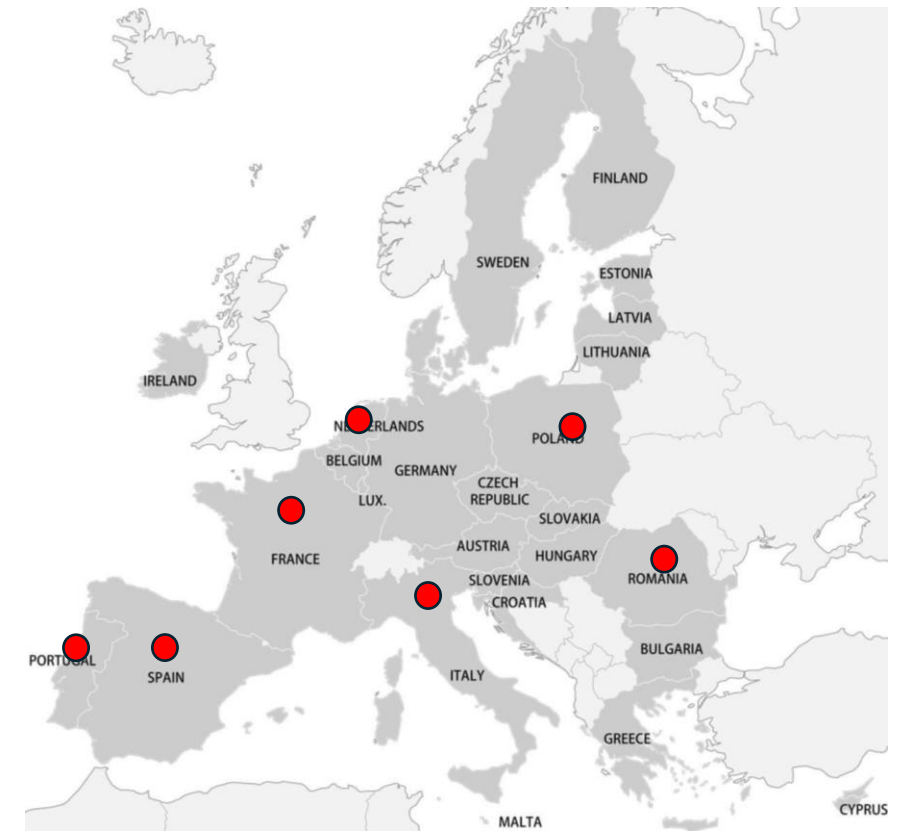

It is not a separate group but a way to grow up interoperability between armed forces and law enforcement in many different fields (cyber, trade wars, intelligence (secret service), illegal traffic (weapons, drugs, humans), financing terrorism and money laundering and so on...)

Law Enforcement Education

There are several law enforcement Institutions with a military status in EU that do not actively involve in EMILYO network:

- Guardia Civil 
- Gendarmerie National 
- Royal Marechaussee 
- Romanian Gendarmerie 
- Polish Gendarmerie 

Law Enforcement Education

Short-term target

- Call for participation of the law enforcement Institutions with a military status
- In this sense, we will want your support to involve them in EMILYO network

Medium-term target

- Develop and implement several exchange activities, not only for law enforcement Institutions but open to all military Academies
- In this sense, we can operate in the common fields of our specific education (illegal traffic, intelligence, cyber, financing terrorism and so on...)

Long-term target

- Maybe someday, we could provide an International Law Enforcement Semester

**thank YOU
for YOUR
attention!**
