General Tadeusz Kościuszko

Military University of Land Forces

Duration of stay

2025

Tasks

- I participated in the BIP mountain training the Greek military school in the Athens.

Highlights

- The entire course was based on a week of preparation for a big scenario. This meant different tasks every day, starting with CLS, military topography ending with shooting from moving vehicles.

Benefits

- The most important achievement of the training was cooperation in an international environment. Learning different techniques, tactics and shooting with new types of weapons.

Recommendations

In my opinion as a cadet in the 4th year:

- more such training exercises should be organised
- it is a very good option to gain a lot of knowledge
- the biggest advantage were different types of troops
