Welcome!

This platform was created in support of the European initiative for the exchange of young officers inspired by Erasmus (or in other words: "Military Erasmus" or EMILYO" or the "Initiative"). It aims to enable European Union initial military education and training institutions (Basic Officer Education Institutions - BOEI), to explore possibilities for quantitative and qualitative exchanges of knowledge and know-how through mobility of their students and personnel.

In this toolbox, several functionalities will help you to explore European Union military officers' basic education and training systems:

- Contacts and information on the European Union officers' basic education and training institutes;
- A search engine for identifying possible partners in exchanges, on the basis of criteria selected among the different levers of mobility;
- A browser of updated announcements of mobility opportunities shared by the European institutes;
- A calendar of the upcoming mobility-related events;
- A repository of basic information, literature and working documents about the Initiative and its lines of development, as well as reports on students'

Proposals...

Interactive Map of BOEI

An interactive European map would visually present:

- All participating BOEI (Basic Officer Education Institutions)
- Number of participants per country
- Active projects and initiatives
- Users would be able to click on institutions or countries to access detailed information.

This feature would make the initiative visibly European, tangible, and strategically structured, reinforcing its scale and cooperation network.

Animated Statistical Counters

Dynamic counters on the homepage would highlight EMILYO's impact, for example:

- **40+ Institutions**
- **27 Countries**
- **5,000+ Cadets Exchanged**
- **21 Lines of Development**

Animated statistics create a sense of growth, credibility, and institutional maturity, while visually strengthening the homepage.

- Cannot be implemented all at once. They require time, planning, and available resources. Therefore, the development of the website should take place gradually.
- A step-by-step approach will allow careful implementation, regular evaluation, and steady progress over time, ensuring both quality and long-term sustainability.
