Friday, 11 th December	Ethics in Hybrid Warfare Assoc Prof. I. Lekea (Hellenic Air Force Academy, GR)	Ethics in Hybrid Warfare Assoc Prof. I. Lekea (Hellenic Air Force Academy, GR)	Final remarks Col. Prof. A. Lesenciuc (Henri Coandă Air Force Academy, RO Assoc Prof. I. Lekea (Hellenic Air Force Academy, GR)	Official closing Colf C. Popovici General Directorate of Information and Public Relations, Romanian MoD Col. Prof. A. Lesenciuc (Henri Coa ndă Air Force Academy, RO)

Preparation for the next Common Module [LoD-21, Hybrid Threats]

Tuesday, 8 September 2026, 71st IG Meeting, Bruxelles, Belgium

Proposals

- April 1-5, 2027, “Henri Coanda” Air Force Academy, Brasov + IPRD Bucharest, Romania
- organized as a BIP
- after the 73rd EMILYO IG, Wroclaw, Poland, March 15-17, 2027, and after Easter holydays
- in parallel with International Air Defence Semester, with no other interference
- the deadlines for registration will be announced during the 72nd EMILYO IG, Vilnius, Lithuania, November 30 - December 2, 2026

European Initiative for the Exchange of young officers inspired by Erasmus

EMILYO - Military Erasmus - Erasmus Militaire - The initiative

nanoschematic

DNA contains the genetic information that allows all modern living things to function, grow and reproduce. However, it is unclear how long in the 4-billion-year history of life DNA has performed this function, as it has been discovered that the ancient forms of life may have used RNA as their genetic material. (1) RNA may have acted as the central part of early life, as it can carry out catalytic functions and carry out catalysis as part of ribozymes. (2) The ancient RNA world, where nucleic acids would have been used for both catalysis and genetics, may have preceded the evolution of the current genetic code based on four nucleotide bases. This would occur, since the coding of genetic data into an expansion of a code. (3) Between 4 billion years of RNA, increasing catalytic activity and a code would be required, using the catalytic properties of RNA. (4) RNA world.

Other aspects [LoD-21, Hybrid Threats]

Tuesday, September 8, 2026, 71st IG Meeting, Bruxelles, Belgium

Vilnius meeting (72th IG meeting)

- Preparation for the next Common Modules
- Questions & worries about the next Common Module on Hybrid Threats - Protection and Enhanced Resilience of Critical Infrastructure
- Future events

Who will organize the 2027 TTT Module & Debate Forum on Hybrid Threats?

...

Strategic – Operational – Tactical Goals of LoD 21 *Hybrid Threats*

- Strategic Level:
 - Creation of a cooperation network for the implementation and promotion of the best practices in the area of awareness and defense against hybrid threats
 - Extension of good educational practices in defending against hybrid threats from military universities to European civilian institutions
- Operational Level:
 - Maintaining the full cycles: common module - TTT module - debate forum/ conference to share best practices
 - Expanding the number of common modules and the number of military universities to run LoD 21 modules

Strategic – Operational – Tactical Goals of LoD 21 *Hybrid Threats*

- Tactical Level:
 - Drafting annually the future LoD 21 activities
 - Establishing the lecturer pool
 - Consultation of the European experts in hybrid warfare
 - Developing educational materials

Other aspects

- A future LoD 21 Vice-Chair: proposals during Vilnius meeting, approval during Wroclaw meeting
