

Romanian Naval Academy “Mircea cel Bătrân”, Constanța, Romania

Foreign Languages Multimedia Laboratories

- 4 fully integrated multimedia laboratories with a networked system of a smartboard, teacher's computer and 21 student computers, all connected to the Internet (21+16x3).
- The XClass multimedia classroom management software connects the teacher with the students in networked environment in the laboratory and facilitates teacher-student and student-student supervision, interaction and communication in a variety of formats.
- The laboratories are used for the teaching of foreign languages (English, French, German) to military students and Maritime English to merchant students.
- The laboratories allow for the integration of a significant variety of interactive digital learning activities with a large spectrum of content format (audio, video, pictorial, textual, etc.) into the teaching process.
- STANAG 6001 language testing is also carried out in these multimedia laboratories as well as end of semester examinations.
