Invitation Letter for Military Multinational Sports and Shooting Games 2026

Dear,

Following the remarkable success of previous editions of the event, the Military University of Technology has a great pleasure to announce the sixth edition of the 'Military Multinational Sports and Shooting Games 2026' to take place at the premises of the Military University of Technology, Warsaw, Poland on 21st-25th April 2026.

The 'Military Multinational Sports and Shooting Games 2025' event is dedicated for cadets from European partner military universities, academies and colleges. The purpose of our University is not only to develop the students' intellectual side and military knowledge but also their physical abilities as required for professional officers, also in a highly differentiated, international environment. During the Games, the participants will meet some physical and military challenges that, I believe, will make them more interoperable.

It will be our immense pleasure to invite cadets of different military academic institutions to join the event, including those who participate in the so-called Military Erasmus program. Therefore, we would be very satisfied if you accepted this invitation and nominated suitable candidates. The event will be also a unique opportunity to socialize during various group events and get acquainted with the infrastructure of the Military University of Technology, Warsaw and Poland.

To confirm your institution's participation in the event, we kindly request that you respond no later than **March 31st, 2026**. Participants are kindly requested to apply for registration via: *emilyo.eu*. Other details, dedicated to the event, can be found on the Emilyo webpage.

I am looking forward to meeting and welcoming your cadets among participants of the Games at the Military University of Technology.

Yours sincerely,

Commandant-Rector

Brigadier General Prof.
Przemysław Wachulak
